

Let me make my point clear. If I wanted to hear commercials I would listen to AM/FM Radio. The local radio stations are horrible. They play the same songs over and over again. I pay over 120.00 a year for commercial free programming that never repeats 80+ times per day. BELIEVE ME IT IS WORTH IT! More than 1.7 million subscribers that are all ticked off in the mornings on the way to work because all they hear are commercials!!! BELIEVE ME IT IS WORTH IT! I get enough junk mail, as it is which is doing nothing but killing many trees. I WILL MAIL ALL JUNK MAIL BACK TO SENDER IT ORIGINALLY CAME FROM WITH THE WORD VOID WRITTEN ON IT, DROP IT IN THE CLOSEST MAIL BOX AND HAVE THEM PAY FOR THEIR SELF POSTAGE ENVELOPES. Let them have their junk mail right back, let them pay for the postage of the self-addressed no postage necessary when mailed in the United States and allow them to fill up their own trashcans. Maybe they will realize it and put a stop to it. Why doesn't the FCC fine these companies for killing trees and nature??? The FCC needs to grow up. Those telemarketers who call you every day around 7pm during dinner - I will tell them two words "Hold On", set the phone down and wait for the phone off the hook signal to sound. Usually they will be more than happy to hold on the line if you ask them to in order to answer another call. Take all their time they are willing to give to you and never return to the line. THIS IS TAKING UP ALL THE PHONE LINES AND SURELY PREVENTS THOSE CITIZENS WHO HAVE EMERGENCY CONDITIONS FROM CALLING FOR HELP DUE TO ALL CIRCUITS BUSY MESSAGES!!! Don't you get ticked off when your trying to make a real phone call and you get the "all circuits busy message"??? Get things straight, grow up and deal with it. ROCK ON XM SATALITE RADIO
